

Combined NEBOSH National General Certificate in Occupational Health and Safety and Construction Certificate

Course length: 17 Days Tuition including revision and exam (10 days if NGC1 already held) and preparation for NCC2 and GC3 (practicals)

Additional work: Private study after class. 2 Practical projects submitted two weeks after exam

Level: Intermediate

Delivery: Classroom

Venues: Nationwide and In-House

Pre-Qualifications: None

- Examinations:**
- NGC1 Two hour Examination if not already held
 - GC2 Two hour Examination
 - NCC1 Two hour Examination
 - GC3 Practical Inspection and Management Report
 - NCC2 Practical construction workplace inspection and management report

Next step qualification: Level 5 NVQ Diploma in Occupational Health and Safety Practice

*CRS provides a Quality Guarantee on all of our NEBOSH courses. This guarantee is known as our **Quality Promise**. We promise that if you take any **NEBOSH** course and sit your exams with us, and for any reason do not pass one or more of your exams, you can re-attend the revision day for the same course within one year from the date of your original exam **FREE OF CHARGE** (the only cost to you will be your NEBOSH registration fees).*

Overview

The NEBOSH National Certificate in Construction Health and Safety (NCC) and the NEBOSH National General Certificate in Occupational Health and Safety (NGC) are nationally and internationally recognised qualifications. They are both designed to help those with health and safety responsibilities, for example managers, supervisors, CDM co-ordinators and employee representatives, from construction or other type organisations, making day-to-day decisions at work. They will give them a broad understanding of health and safety issues and enable them to manage risks, within workplace activities, effectively.

Many people take the NEBOSH NCC and/or the NEBOSH NGC as a first step in a career in health and safety. The qualifications both meet the academic requirements for Technical membership (Tech IOSH) of the Institute of Occupational Safety and Health (IOSH). They provide a valuable overview and are a sound basis for further professional study.

Target Audience

The NEBOSH NCC and the NEBOSH NGC are aimed at Supervisors, Managers, CDM co-ordinators and employee representatives, within industry who are required to ensure that activities under their control are undertaken safely. They are likely to prove useful for those concerned with the management of buildings who may need to ensure that contractors are working safely. The qualifications are also appropriate for supervisors and managers working in other industries such as utilities, and even broadcasting, where temporary workplaces are a feature of their activities.

Assessment Process

The NEBOSH NCC and the NEBOSH NGC both consist of three units; each separately assessed (enabling students to choose to take individual units in any order over a five year period).

NEBOSH NCC: NGC1 Management of health and safety, NCC1 Managing and controlling hazards in construction activities and NCC2 Construction health and safety practical application.

NEBOSH NGC: NGC1 Management of health and safety, GC2 Controlling workplace hazards and GC3 Health and safety practical application.

Are you already one step towards your NEBOSH NCC and NGC?

Unit NGC1 (Management of health and safety) is common to the NEBOSH National Construction Certificate, the National General Certificate and the Certificate in Fire Safety and Risk Management, enabling students to combine units across NEBOSH qualifications. Students do not need to re-sit any units already successfully achieved providing they were gained within the last five years.

1. NEBOSH recommends that participants allow additional time for private study. Our tutors will provide direction on the requirements.
2. We can also provide tuition and examination for unit NGC1 to those who require it – please contact us for further details.

Syllabus

Unit NGC1: Management of Health and Safety:

- Health and safety foundations
- Policy
- Organising for health and safety
- Promoting a positive health and safety culture
- Risk assessment
- Principles of control
