Venues:	In-House
Pre-Qualifications:	Participants must have completed an IOSH Managing Safely course within the last 3 years
Examinations:	End of course test
Next step qualification:	NEBOSH National General Certificate in Occupational Health and Safety

---

## Overview

The participant's original IOSH Managing Safely course was designed to inform them as managers and supervisors working in any organisation or sector about health and safety management systems. After (say) three years, some of the required core knowledge can be lost if it has not been used regularly; and/or over the same period new laws or new practices can have emerged. Our IOSH Managing Safely Refresher course brings past-participants up-to-date on all applicable changes and practices.

Participants successful in the test and the project are awarded the Managing Safely Refresher certificate by IOSH.

## Target Audience

The course is designed for managers, supervisors, safety representatives and members of health and safety committees in all roles and functions who have previously been awarded an IOSH Managing Safely certificate

## Assessment Process

The assessment is broken down into two parts:

- Participants complete an end of course test comprising short answer questions
  - Following the course, participants complete a health and safety risk assessment in their own workplace
- 

## Syllabus

The original course consists of eight modules:

- Module 1 – Introducing Managing Safely
- Module 2 – Assessing Risks
- Module 3 – Controlling Risks
- Module 4 – Understanding your responsibilities
- Module 5 – Identifying hazards
- Module 6 – Investigating accidents and incidents
- Module 7 – Measuring Performance
- Module 8 – Environment and Client specific content

The refresher course brings all of those matters up-to-date, reminding and refreshing knowledge on the key health and safety management techniques

---

## Additional Notes

We think that this course can be improved with a short site tour focussing on hazards, harm, risk assessment and control, if this can be arranged.
